

1. Title and Metadata

Project name: QA Portfolio – Functional Tests

Module: Login, Registration, Password Reset

Author: Przemysław Gnus

Date: 25.09.2025r.

Application version: demo – the-internet.herokuapp.com

2. Test Scope

Tested functionalities:

- Login
- Registration
- Password reset (Forgot password flow)

The scope included:

- Positive scenarios (happy path)
- Negative scenarios (e.g., invalid data, validations)

3. Methodology

- Manual tests prepared in Excel (test case table).
- Bug reporting and tracking in Jira.
- Tests executed in a demo environment.

4. Test Results

- Total number of test cases: 7
- Statuses:
 - Completed (Passed): 3
 - Failed: 1
 - Blocked (dependent on other cases): 3
- Reported bugs (in Jira):
 - Bug-001: Internal Server Error at password retrieval

5. Conclusions

- Critical functionality Forgot Password is not working correctly (server error + no email delivery).
- Core scenarios such as login and registration work as expected.
- The password reset module requires fixes before being released to production.
